

## Grade 7 Poster Image

### Poster Notes

This photograph was taken in the interior of Senegal, Africa. The nine-year-old girl in the poster lives in a thatched roof, circular-shaped, tiny house with a mud floor. Her entire family shares two beds and one room. Although there is hope things are changing in Africa, this young girl does not go to school. Instead, she helps her mother care for the younger children, gather firewood and fetch water in order to make the family's one daily meal of cassava. Often, girls and women in Africa do not get the chance to go to school and have their voices heard. This young girl was determined to be noticed by the photographer!
